RSK-FP02
Fingerprint Reader

RSK-FP02 fingerprint reader: a perfect module for RuggON Rextorm series rugged tablet

With its integrated fingerprint reader, RuggON Rextorm series rugged tablet is the shortcut to successful biometric identification.

RuggON Rextorm series rugged tablet is designed to withstand harsh uses in industrial environments while its full range of purpose-built peripherals also helps increase overall productivity and reduce operational costs.

Equip public safety and medical emergency professionals with utmost accuracy and durability
Fingerprinting has long been a critical requirement for paramedics on ambulances and for law enforcement officers at borders or road checks. How to ensure a high-quality data capture process with a durable fingerprint reader is thus extremely important. Designed to meet IPX5 and FIPS 201 PIV certification, RuggGEAR RSK-FP02 fingerprint reader can accurately scan and verify an individual's biometric characteristics in seconds.

RuggGEAR RSK-FP02 is applicable to various industrial applications
RSK-FP02 fingerprint reader serves as a value-added solution to a wide range of security-related industries. It not only enhances security control but also boosts authorization function and workflow management.

Specification:
• FIPS 201 PIV certificate
• Capacitive type, 508 dpi
• IPX5 design
• Supports OS: Windows & Android
• Supports Windows Hello plug and play
